SUMMARY

IT student at York University (exp. 2027) specializing in systems and business analysis. Hands-on experience in SQL database design, requirements engineering, UML modelling, and IT risk assessment. Seeking a co-op or internship role as an IT/Systems Analyst or Database Analyst.

EDUCATION

Bachelor of Arts (Honours), Information Technology

Expected April 2027

York University — 4700 Keele St, Toronto, ON

Relevant Coursework: Systems Analysis & Design, Requirements Management, Enterprise Architecture, Database Systems, Networks, OOP, IT Risk Management, UI Design, Web Technologies

PROJECTS

Relational Database Design & SQL Querying — Oracle 19c

Winter 2026

ITEC 3220 — Database Systems, York University

- Designed and created a relational schema for a boat/voyage management system with 4 inter-related tables enforcing primary key, foreign key, and referential integrity constraints in Oracle SQL*Plus.
- Loaded data using SQL*Loader utility and INSERT statements; wrote control files and Linux script commands to automate data ingestion.
- Developed 8 complex SQL queries involving JOINS, subqueries, GROUP BY/HAVING, aggregate functions (COUNT, SUM, MAX), and correlated subqueries to answer analytical business questions against the populated database.
- Queries addressed scenarios such as skipper voyage analytics, identifying unused resources, longest voyage detection, and filtering by manager hierarchy — demonstrating strong SQL analytical skills.

EXPERIENCE

Student Helper

Sep 2017 – Jun 2018

St. Francis Xavier Catholic School — Toronto, ON

- Assisted teacher with daily activities for Grade 2 and 3 students, including planning drawing and writing exercises.
- Set up and configured laptops and iPads for students participating in online learning activities.
- Maintained organized and clean classroom environments to support effective learning.

TECHNICAL SKILLS

Languages & Databases: SQL (Oracle 19c), Java, JavaScript, HTML/CSS

Tools & Platforms: SQL*Plus, SQL*Loader, Oracle 19c, MS Office Suite

Methodologies: UML Modelling, Requirements Engineering, Systems Analysis & Design, IT Risk Assessment

Core Competencies: Technical Troubleshooting, Documentation, Problem-Solving, Communication

AWARDS

York University Continuing Student Scholarship

2024/25

Awarded for achieving outstanding academic results in the 2024/25 Fall/Winter and Summer sessions.
